Subject: Thank you

Hello Wayne,

Since we are close to the end of the project I just wanted to drop you a line and thank you and your team on the great work that has been done in our time of need. You especially have been nothing but professional, upfront and informative. These are the fine attributes that my wife and I were hoping for since construction and contracting are not our profession. Needless to say this was a very hectic time for our family and once again you and your team made it very easy on us. You know your business very well and do a great job managing your team and putting us at ease. We are still amazed how fast this was all pulled together and we are close to completion in less than 3 weeks. Please express our gratitude to all your workers from our family and thank you for being the leader of group. We will feel very confident in recommending Nubilt to all our friends and family for their future projects.

Sincerely,
John and Julie P [REDACTED]
